GitHub: <https://github.com/Whyer2005>

GitLab: <https://gitlab.com/Whyer2005>

Skills

Programming: Python, TypeScript, JavaScript

Frontend: React, TypeScript, Next.js, HTML, CSS

Backend: Node.js, Prisma ORM

Database: SQLite, MySQL

Cloud & Deployment: Vercel

DevOps & Tools: GitHub action, Docker, Gitlab CI/CD, n8n

AI Tool: ChatGPT, Copilot, Gemini

Project

LocalHot-Spot (Ongoing)

Full-Stack Developer

- Designed and developed a web application for community-based voting and popularity ranking of locations, shops, and attractions in Phayao.
- Built user interfaces using React, Next.js, and TypeScript.
- Designed RESTful APIs and business logic for vote processing and ranking calculation.
- Implemented database schema using SQLite with Prisma ORM.
- Developed data tracking and analytics features to generate dynamic ranking statistics based on user selections.

Boardgame-shop-Voice-assistant (Course Project)

Front end & Workflow Automation Developer (n8n)

- Developed a voice-based product search web application using Next.js and TypeScript (.tsx).
- Integrated Web Speech API for Speech-to-Text and Text-to-Speech interaction.
- Implemented keyword scoring algorithms for product search matching.
- Connected automation workflows using n8n Webhooks for backend processing.

Vo-Card

Frontend Developer

- Developed and added About, Contact, and Feedback pages using JSP.
- Created a PageController to manage routing and page navigation.
- Designed and implemented a feedback system to evaluate performance, accessibility, and user satisfaction.
- Improved UI consistency including navbar, typography, and layout structure.
- Developed and maintained CSS styling for new web pages.
- Performed testing in a local development environment.

Education

2024 – Present

University of Phayao, Thailand

Bachelor of Science in Software Engineering

Faculty of Information and Communication Technology (ICT)

GPA: 3.11
